The first section is called Two In One. You are given 2 pictures, with each picture representing part of the longer word, and you need to put two parts together to guess the word. The second section is called Mixture and Make, where again you are presented with 2 pictures, but you need to mix both pictures and guess the results of this mix. You are given several blanks and a bunch of alphabetical letters at the bottom of the screen. You need to drag the blank letters to form an answer. When you get stuck, you can tap a question mark to bring up the help menu that will provide you with Optional: you can remove additional letters from the letter groups available for 125 coins, disclose a response letter for 75 coins, or reveal a word (for one picture) for 150 coins.
